Kennecott

April 17, 1981

Salt Lake District Office
Bureau of Land Management
2370 South 2300 West
Salt Lake City, Utah 84119

Gentlemen:

Subject: Notice - Disturbance of Five Acres or Less of Public Lands

1. Claimant and Operator:

Kennecott Minerals Company
Utah Copper Division
P. O. Box 6500
Salt Lake City, Utah 84106

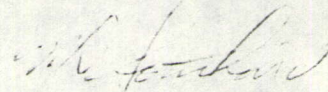

Attn: W. D. Southard - Division Engineer

2. Site consists of a total of 13 adjoining, unpatented lode claims recorded as Gracie D No. 1 through Gracie D No. 13.
3. Kennecott hereby proposes to commence open pit mining operations approximately June 1, 1981, to obtain a 10,000-ton bulk sample of metallurgical grade limestone from claims described in Paragraph 2 above. These claims are located near the mouth of Mercur Canyon (Sections eleven (11) and twelve (12) T6S, R4W, Salt Lake Base and Meridian), Tooele County, Utah. This limestone sample will be taken and tested for quality at Kennecott's lime processing plant in Magna, Utah. The main access will be via Swensen Gulch. Two short access roads will be constructed using a bulldozer and a road grader. One road will extend approximately 400 feet from Swensen Gulch westward to an intended soil stockpile. The other road will extend approximately 300 feet eastward toward the quarry site. If construction of these access routes involve slopes which require cuts on the inside edge in excess of three feet, Kennecott will consult with an authorized BLM officer to determine the most appropriate locations prior to commencing operation.

April 17, 1981

4. Kennecott hereby agrees that reclamation of all areas disturbed will be completed to the standard described in Section 3809.1-3(d) of the Bureau of Land Management's Rules and Regulations for Surface Management of Public Lands as published in the Federal Register (Vol. 45, No. 230) Wednesday, November 26, 1980.
5. Less than two acres of surface land will be disturbed. Therefore, a Declaration of Exemption was submitted to the State of Utah Department of Natural Resources, Division of Oil, Gas and Mining, as required to comply with the Utah Mined Land Reclamation Act of 1975. In addition, a copy of this notice has been forwarded to the Utah Division of Oil, Gas and Mining.
6. Exhibit (A) shows the approximate location of the proposed mine site. Exhibit (B) describes the mine site and shows premining topography.

Very truly yours,

W. D. Southard
Division Engineer
